**SATISFACTORY  
RESULTS**  
in  
**INFANT FEEDING**

These pure Corn Syrups have been widely used for infant feeding for years and have proved to be a safe and satisfactory carbohydrate for the purpose.

They may be used as an addition to any milk formulae, with excellent results.

Furthermore, they are readily obtainable in any grocery store, are easily mixed and are more economical.

Produced under the most hygienic conditions by the oldest manufacturers of Corn Syrups in Canada, you can recommend them with confidence in their purity and high quality.

## PHOTELOMETER

**T**HIS instrument is immensely valuable in the laboratory handling many similar samples in which the same constituent is determined, as only a few seconds are consumed in the actual determination of the quantity of substance present.

The Mayo Clinic of Rochester, Minn., is using this instrument for the determination of hemoglobin in blood, creatinin, bilirubin and blood sugars with great success. Over 200,000 determinations of hemoglobin have been made with the instrument in the clinic with an accuracy and speed not possible with the usual methods of analysis.

# CAFATRAYS

**REDUCE TRAY COST** because CAFATRAYS retain shape and color for years. Will not dent, bend, warp, crack nor break with roughest use.

**QUIET . . .** CAFATRAYS are made of a resilient composition that will not clatter when dropped nor bang when knocked against any material, even metal.

**BEAUTY . . .** CAFATRAYS rich butt mahogany color is moulded right into the tray and lasts forever. Smartness at reasonable cost.

**STAINLESS . . .** Fruit juices and alcohol have no effect on the beautiful CAFATRAYS surface and any type of dishwashing machine keeps it gleaming like new. No buffing or scouring. Profitable economy.

**LIGHT . . .** Heavy trays are back breakers and light ones are usually fragile, but CAFATRAYS are tough as leather. The ROLLED EDGE construction adds strength where most needed.

**DEPENDABLE IN SIZE AND SHAPES . . .** No matter when you buy additions to your CAFATRAYS stocks the new trays will always nest and stack perfectly with the old.

## ELEVEN POPULAR SIZES:

No. 75	4 1/2" x 6 1/2"
No. 1344	6" x 8"
No. 1345	8 1/2" x 11"
No. 1346	10 3/4" x 14"
